Predicting Appliance Trouble: Life Expectancy And Repair Rates

While the provided figures offer a snapshot of typical appliance lifespans, proactive maintenance and following manufacturer guidelines can significantly enhance their longevity and minimize the risk of breakdowns.

REFRIGERATORS

Approximately 40% of refrigerators develop problems within the first five years. They generally last for 13 years.

WASHING MACHINES

Similar to dishwashers, washing machines also have a 30% chance of malfunctioning within the first five years and an average lifespan of 10-14 years.

DISHWASHERS

These tend to be the most problematic appliances, with around 30% experiencing issues within the first five years. They typically last around 9-13 years.

DRYERS

Dryers are slightly less prone to breakdowns compared to the previous appliances, with a 20% chance of encountering issues within the first five years. Their average lifespan is 10-14 years.
